WORKING FOR THE FUTURE

RADDIPLUS binder systems for flowing floor screeds from mixing mobiles

> CASEA

CASEA GmbH has specialised in the mining and further processing of gypsum and anhydrite and offers a broad range of screed binders for the building materials industry

casea-gips.de

The whole variety of calcium sulphate screed binders from one single source

CASEA is your competent contact partner as far as high-quality screed binders are concerned. Since February 2013, the newly founded company has been responsible for all gypsum activities of the REMONDIS group. The company combines the experience of Südharzer Gipswerke (SHG) and the know-how of the RADDIBIN quality brand - for best quality and top-class service.

CASEA monitors the entire production process from the selected raw materials to the finished product

The perfect basis for every floor

CASEA offers you screed binders satisfying the highest requirements. In our products, we combine the advantages of thermal, synthetic and natural anhydrites as well as of alpha gypsum in special recipes. In this way, we guarantee outstanding product and processing properties for every application. Also when it comes to quality, we do not leave anything to chance: all screed binders comply with the valid standards and are internally and partly also externally monitored.

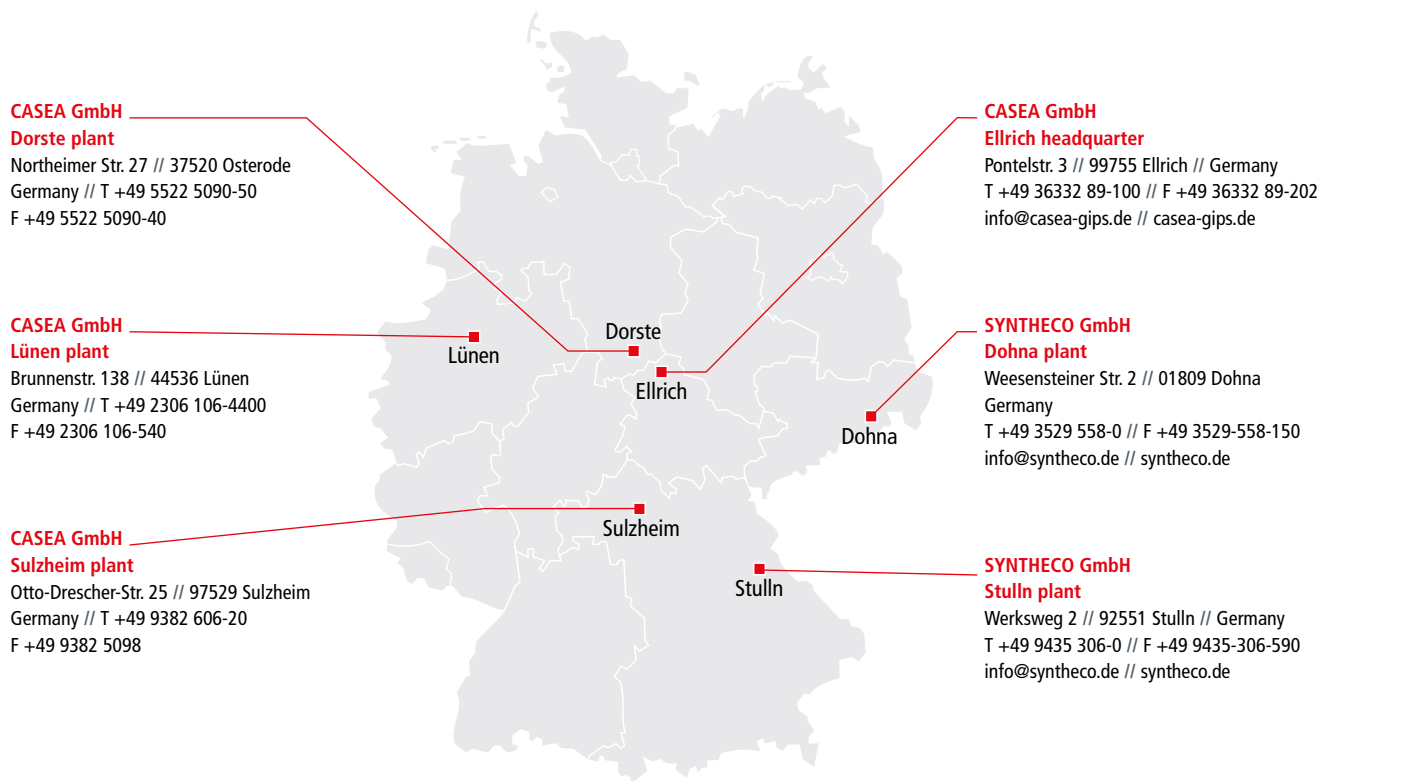

SYNTHECO – Specialist for synthetic anhydrite

Our binder systems on the basis of synthetic anhydrites are marketed via SYNTHECO, a joint venture of REMONDIS and the Fluorchemie Group.

> Powerful group

With about 200 employees and an annual turnover of EUR 60 million, CASEA works in the area calcium sulphate binder at 6 locations in Germany and sells up to 1 million tons of raw materials, binders and finished products per year.

Production at 6 locations in Germany

for your ideal binder system

With flowing floors screeds on the basis of CASEA binder, all common screed constructions are possible: base-bonded screed, screed on separated layer, screeds and heating floor screeds on insulation layers

> RAW MATERIALS / PRODUCTS / APPLICATIONS

Secured raw material supply

Due to the mining in own quarries in the vicinity of the plants, CASEA guarantees a close and flexible supply of natural gypsum and natural anhydrite. Apart from that, long-term contracts with experienced partners secure the supply with REA gypsum and synthetic anhydrite of highest purity. Due to long-term know-how in the preparation technology area, our products are always available to you in needs- and application-oriented quality.

Individual qualities at the push of a button

The binder compounds of CASEA for mixing vehicle systems are adjusted in an aggregate- and system-specific manner. High substance purities of our binder compounds allow small binder shares for this system application as well as a cost-optimised use and constant and stable mortar qualities.

Clean thing: premixed dry mortar and multi-chamber silo

The CASEA binder compounds for the application areas "Premixed dry mortar" and "two-chamber silos" consider the raw material fractions used of the aggregate. Apart from that, special product properties can be set upon request by selecting different binder compositions and sand qualities.

Mixing vehicles with CASEA binding compounds are able to adjust the quality of flowing screed to the relevant requirements by changing the recipes on site

Product name	Basis on the binder	Form of delivery*
RADDIPLUS T	Thermal anhydrite	bulk
RADDIPLUS S	Synthetic anhydrite	bulk
RADDIPLUS A	Alpha gypsum	bulk
RADDIPLUS NA	Natural anhydrite/alpha gypsum	bulk
RADDIPLUS NT	Natural anhydrite/thermal anhydrite	bulk
RADDIPLUS TS	Thermal anhydrite/synthetic anhydrite	bulk
RADDIPLUS NA rapid	Natural anhydrite/alpha gypsum	bulk

In addition to the standard products, CASEA is also able to satisfy special customer requirements and to produce individual flowing floor screed compounds

* Big bags and bagged goods upon request

CASEA

WORKING FOR THE FUTURE

As a specialist for mineral products, CASEA offers a broad range of calcium sulphate screed binder systems among others. CASEA is part of REMONDIS, one of the world's largest recycling, services and water companies. The corporate group has more than 500 subsidiaries and participations in 34 states in Europe, Africa, Asia and Australia. Here more than 30,000 employees work for about 30 million citizens as well as many thousand companies. At the highest level. In the name of the future.
